

Project Design Phase 1

Solution Architecture

Date	15 October 2022
Team ID	PNT2022TMID10555
Project name	Project-Real Time River Water Quality Monitoring And Control System
Maximum Marks	2 mks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges

the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the

software to project stakeholders.

- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.
