IBM cloudant:

Cloudant is an IBM software product, which is primarily delivered as a cloud-based service. Cloudant is a non-relational, distributed database service of the same name. Cloudant is based on the Apache-backed CouchDB project and the open source BigCouch project.

IBM Cloudant account and database:

The screenshot shows the IBM Cloudant web interface. On the left is a dark sidebar with navigation links: Monitoring, Databases (selected), Replication, Active Tasks, Account, Support, and Documentation. The main area is titled 'Databases' and features a 'Database name' dropdown, a 'Create Database' button, and icons for database operations. Below this is a table titled 'Your Databases' with columns: Name, Size, # of Docs, Partitioned, and Actions. One database is listed: 'iot-based-rtwqmacs' with a size of '0 bytes', 0 documents, and is not partitioned. The footer shows 'Showing 1-1 of 1 databases', 'Databases per page' set to 20, and a pagination control showing '1'.
