

1

SAYS

- Complex to do
- Takes a lot of money that can't be put into
- Water management or polluting water
- Requires lot of technological components

THINGS

2

- Sensory components and environmental recognition
- Flow between different process cycles
- New advancement technology and varied algorithms
- Properties, credit score and parents

DOES

- Can be applied as hardware and also in online mode
- Battery operated better than wall operated
- Well insulation of components for water monitoring
- Contain database system for handling all forms of inputs

FEELS

- Safe drinking and cleaning water for people
- Time efficient and dynamic
- affordable prize and much useful in monitoring
- Ease to apply
